About

Full Stack Developer constantly learning. I studied Architecture and that career teached me about team collaboration, project planning, and creative ideation.

Specializing in Front-end development with a solid foundation in Back-end. Proficient in building React components , emphasizing both logic and design, as well as developing routes and controllers, always with a modular, clear, and clean code.

Tech Skills: JavaScript, CSS, React, Redux, Redux toolkit, Tailwind, Node.Js, Express, Sequelize, PostgreSQL.

Soft Skills: team work, emotional intelligence, empathy, perseverance, problem solving.

Other knowledge: Trello, Jira, Git, Figma.

English proficiency: C1 [Certificate](#)
